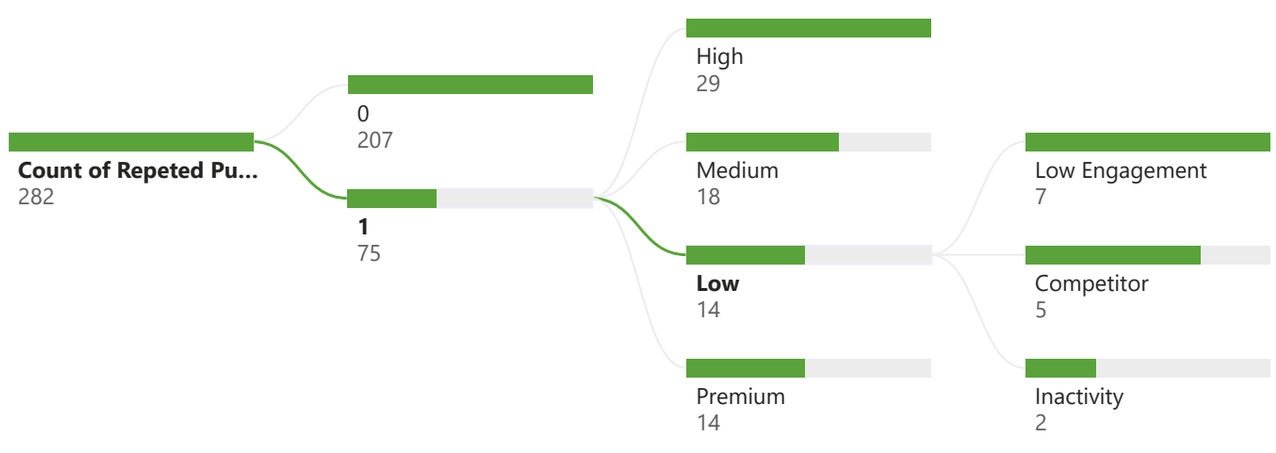
Churn_Reason ×



Top 3 recommendations for Adidas

Which customers to prioritize for retention?

We have to prioritize the customer who have high CLV and give them attractive offers for there repeated purchase.

Which channels are underperforming?

The online channel isn't performing as well as the store channel in most regions. It has fewer stores and hasn't grown as steadily over the years. Physical stores are doing better and have a wider reach. The brand should work on strengthening its online presence and sales.

How to strengthen loyalty program engagement?

Members in higher tiers like Premium and Elite aren't using their points much more than Base members. To improve engagement, give them better rewards, make redeeming points easier, and send personal offers to keep them interested.
